HOSPITAL ADMISSION RECORD

=====

Patient ID: PID002      Admission Date: 10-02-2025

Age: 62 Discharge      Date: 14-02-2025

Gender: Female      Admitting Physician: Dr. Gupta

Blood Type: A-

=====

PRIMARY DIAGNOSIS: Diabetes Type 2, Uncontrolled.

HOSPITAL COURSE: Patient admitted as planned for stabilization of blood glucose and comprehensive diabetic education. Upon admission, fasting blood sugar was 210 mg/dL. An insulin therapy regimen was initiated to bring glucose to target levels, alongside oral medication (Gliclazide). The patient responded well to treatment. She attended multiple educational sessions with a diabetic nurse educator and a dietician. Glucose monitoring techniques were taught and successfully demonstrated by the patient.

PLAN: Discharge on 14-02-2025 with a stable oral medication plan. Patient to monitor blood glucose at home and follow up as an outpatient.
